For the Board Meeting of: 6/16/2022

## Executive Summary

We have seen a significant amount of activity this month with a weather event causing significant claims, broker ownership changes, and the upcoming Pearson purchase. The first announcement we saw was that Brown and Brethour had been purchased by McDougall Insurance. After speaking with Gary about this purchase, he mentioned that the larger markets have minimum premium volume requirements of significant amounts ( $\$ 3,000,000$ for Aviva for example) and they just could not keep up as a small brokerage. We have met with Don Stanton from McDougall Insurance and have agreed to continue a contract with Brown and Brethour and will meet again in six months to discuss the relationship again. We have struggled to get more premium increase from Brown and Brethour throughout the years so we will continue to monitor the business and growth. We have also received some significant news from Newman Insurance that they were purchased by NavaCord. NavaCord operates more as an investor, and we have been told nothing will change with our relationship with Newman Insurance. Alec is setting up a meeting with Navacord so we are able to meet with them and discuss the future of this large book of business. At this time, these acquisitions are not considered high risk, however will require some further investigation and monitoring to ensure the relationships and business continue moving forward.

Tifanny and I did some training with a few new staff members at Petley Hare Insurance over zoom. Warren and I completed training for the new broker HRC Insurance. We have begun to see new policies coming in already for this brokerage. We continue to plan for the upcoming Pearson purchase, with less three weeks to go. Our new summer student, Rileigh Darling, started in the Pearson office to assist with administrative tasks to help relieve some of the work that Sharon currently does. We are working on organizing everything for the upcoming Broker Forum as well.

I also wanted to take this opportunity to share that my husband and I are expecting a baby girl in November. We are very excited for this new addition.

## Update on my Department

The agents came into the office on May $25^{\text {th }}$ to meet as a team and discuss how the agents will operate moving forward. Most of the consensus was that they would still like to service their own clients, based on territory, however there will be opportunity for Karen and Scott and assist Cameron and Amanda with tasks such as answering phones, submitting change requests to underwriting, and covering when people have vacation. We were hoping to begin training on the new Cognition+ system for quoting, however we are waiting for a few changes to be completed before moving forward with this. In the meantime, the agents have a good system for quoting that they will continue to use. We will have our new phones systems set up for July $1^{\text {st }}$ in the agent offices to help streamline phone calls.

The agents have written 25 new business year-to-date.

## Update on Major Goal(s)

Consumer Portal Project - On hold waiting for the recent update that is coming soon.
Marketing - Great progress has been made with our Marketing Project. The Website is being created by AdHome, and the Agent Logo has been complete.

Pearson Insurance - Agreement has been signed. Phone systems to be installed July $1^{\text {stt }}$. Setting up new E\&O policy, lining up cleaners. Sent out letters notifying policyholders of the upcoming change.
